---

## PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience delivering **scalable, production-grade applications** using **Java, Spring Boot, microservices, and modern frontend frameworks**. Experienced in **System Design, Database Optimization, Containerization, and cloud deployments**, with a track record of improving performance, reliability, and development efficiency. Adept at working in agile teams, owning end-to-end features, and contributing to high-quality, business-driven solutions.

---

## CORE SKILLS

### Programming Languages:

Java, TypeScript, JavaScript, PHP, SQL

### Frameworks & Libraries:

Spring Boot, Hibernate/JPA, Express.js, React, Next.js, Angular, Laravel, CodeIgniter

### Databases:

PostgreSQL, MySQL

### Cloud & DevOps:

Docker, Docker Compose, AWS (EC2, S3), CI/CD, GitHub Actions

### Architecture & Concepts:

Microservices, REST APIs, Multi-Tenancy, Authentication & Authorization, System Design

### Tools:

Git, Linux, Postman, Swagger, Jira

### AI Tools:

Claude AI, Claude Code, ChatGPT, Firebase Studio

---

# PROFESSIONAL EXPERIENCE

## Senior Software Engineer

Techcess Business Solutions – Nugegoda, Sri Lanka  
August 2023 – Present

- Designed, developed, and maintained **Full-Stack applications** using **Java (Spring Boot microservices)** and **Next.js**.
  - Built and optimized **RESTful APIs** and frontend components with a focus on performance, scalability, and maintainability.
  - Collaborated closely with **architecture designers** to understand and implement system architecture and best practices.
  - Worked with **DevOps teams** to containerize applications using **Docker** and implement **CI/CD pipelines** with **Azure DevOps** for microservices deployments.
  - Took technical ownership of key modules, identifying and resolving complex production issues to ensure system stability.
  - Led, trained, and mentored a team of **junior developers**, providing technical guidance, task planning, and continuous feedback.
  - Conducted regular **code reviews**, enforcing clean code principles, coding standards, and best practices.
  - Actively adapted to new technologies and frameworks to meet evolving project and business requirements.
- 

## Software Engineer

Techcess Business Solutions – Nugegoda, Sri Lanka  
January 2022 – August 2023

- Developed and maintained web applications using **CodeIgniter 3 (PHP)**.
  - Analyzed, debugged, and resolved complex issues in the **Fee Module**, ensuring application stability and correctness.
  - Took ownership of the fee module in an ongoing production system, handling enhancements, bug fixes, and technical decisions.
  - Collaborated with team members to understand existing system behavior and improve functionality.
  - Ensured code quality by following best practices and maintaining consistent coding standards.
- 

## Software Developer

Infact Solutions PVT Ltd – Pepiliyana, Sri Lanka  
December 2019 – January 2022

- Developed and maintained web applications using **Laravel (PHP)** and **Angular**.

- Implemented reactive frontend features using **RxJS** to manage asynchronous data flows.
  - Designed and consumed RESTful APIs to support frontend functionality
  - Applied best practices in coding standards, code reviews, and version control to ensure high code quality.
  - Collaborated with cross-functional teams to analyze requirements and deliver features on schedule.
  - Identified and fixed bugs, improving application stability and performance.
- 

## Intern Software Developer

OpenArc Systems Management (Pvt) Ltd – Kirulapone, Sri Lanka  
May 2019 – December 2019

- Technology Adaptation

- Developed and maintained web application features using **Angular 7 and JavaScript**
  - Assisted in analyzing functional and technical requirements and translating them into working solutions.
  - Debugged and resolved frontend issues to improve application stability and usability.
  - Collaborated with senior developers to understand best practices, coding standards, and application architecture.
  - Researched technical issues and identified relevant resources and documentation to support problem resolution.
- 

## KEY PROJECTS

### School Resource Planning System

*Multi-Tenant, Microservices-Based Enterprise Platform*

- **Led the design and development** of the **School Resource Planning Platform (SaaS)**, addressing scalability and performance limitations of the legacy system.
- Architected and implemented **Java-based microservices** using **Spring Boot 3.1 and Java 17**, with **PostgreSQL** as the primary datastore.
- Developed a modern frontend using **Next.js** with **reusable, modular components**.
- Implemented a **multi-tenant architecture** supporting **7 branches**, including a **central service** for shared operations.
- Designed **schema-level separation** of transactional data in PostgreSQL to ensure tenant isolation and data integrity
- Integrated **Keycloak** for authentication and authorization across services
- Implemented **asynchronous processing** using **message queues (SQS)** and scheduled **automated surcharge generation jobs**
- Acted as the **key technical lead**, guiding the team, defining solutions for legacy issues, and driving the project from initial setup through continuous development and enhancement.

**Technologies:** Java 17, Spring Boot 3.1, Microservices, PostgreSQL, Next.js, Keycloak, Docker, Message Queues, Multi-Tenancy

## E-Commerce Platform

### *Modular Web Application*

- Developed frontend modules using **Angular**, focusing on **lazy loading** to improve application performance and load times.
- Designed modular components to support scalability and maintainability.

**Technologies:** Angular, Lazy Loading, Modular Architecture

---

## EDUCATION

### **BSc (Hons) Computing**

Wrexham Glyndwr University – London, United Kingdom  
2022

### **Higher National Diploma in Information Technology**

Advanced Technological Institute – Tangalle, Sri Lanka  
2019

---
